## **DETAILED ACTION**

### ***Drawings***

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on December 6, 2001 have been disapproved because they introduce new matter into the drawings. 37 CFR 1.121(a)(6) states that no amendment may introduce new matter into the disclosure of an application. The original disclosure does not support the showing of the detailed structural rendering of the two stage compressor. The examiner would suggest a schematic representation of the compressor.

Additionally, according to 37 CFR 1.173 (3) a figure which is canceled must be surrounded by brackets and identified as canceled. Therefore any new representation of the compressor should be added as a new figure and the specification amended accordingly.

### ***Specification***

The amendment filed December 6, 2001 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the two stage compressor has two rotating *discs*.

Applicant is required to cancel the new matter in the reply to this Office Action.

*Reissue Applications*

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,718,112 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

As set forth above the changes proposed to figure 5 and the material added to the specification constitute new matter. 35 USC 251 states that "no new matter shall be introduced into the application for reissue."

Claims 1 and 2 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

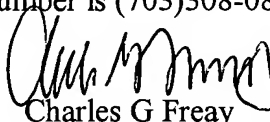

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.
